

TRAK

SANITISER CLEANER & TANNIN REMOVER

- **Removes stains ***
- **Effective tannin stain remover**
- **Non-foaming - ideal for hand or machine use**

USES

A dilutable sanitiser cleaner designed to remove food deposits and staining caused by tea and coffee on crockery and cutlery.

With a hypochlorite sanitiser base, the pale yellow liquid is an effective bactericidal cleaner and incorporates a hard water formulation to protect surfaces from scale.

Trak is suitable for use through automatic dishwashing machines when used in conjunction with CLOVER Rinse Aid. Safe on aluminium when used through automatic dishwashing machines.

N.B. Items made from glass or aluminium should only be cleaned with TRAK through a dishwashing machine.

DIRECTIONS

Tannin Removal - Make up a solution of Trak in a sink or bowl. Soak stained crockery and cutlery until tannin stains have been removed. Rinse all items thoroughly with clean water.

Cleaning Aluminium - Trak minimises any damage done to aluminium during a heavy duty cleaning operation. Always rinse Trak away immediately. Do not allow aluminium or glass to soak in Trak or in a solution of Trak. Items made from glass or aluminium should only be cleaned with Trak through a dishwashing machine.

Use biocides safely. Always read the label and product information before use.

DILUTIONS

Dishwashing Machine use - 2% - 5% dilution.

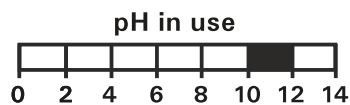

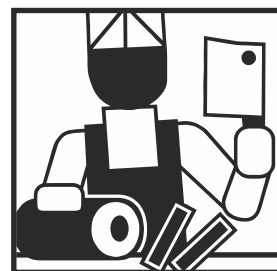

De-tanning Crockery (soaking); 5% dilution.

Surface Disinfecting; 5% - Dilute 1 part Trak to 20 parts with water.

* From bleach resistant surfaces.
